lang.support.es

Language support for Spanish

Description

This function adds support for Spanish to the koRpus package. You should not need to call it manually, as that is done automatically when this package is loaded.

Usage

```
lang.support.es()
```

Details

In particular, this function adds the following:

- `lang`: The additional language "es" to be used with `koRpus`
- `treetag`: The additional preset "es", implemented according to the respective `TreeTagger`[1] script
- `POS_tags`: An additional set of tags, implemented using the documentation for the corresponding `TreeTagger` parameter set[2]

To also be able to use hyphenation, the package `syll.es` needs to exist and be loaded.

References

[1] <http://www.cis.uni-muenchen.de/~schmid/tools/TreeTagger/>

[2] <http://www.cis.uni-muenchen.de/~schmid/tools/TreeTagger/data/spanish-tagset.txt>

Examples

```
## Not run:  
lang.support.es()  
  
## End(Not run)
```
